### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Nathan Grebasch on 3 June 2009.

The application has been amended as follows: **in the claims**

In claim 42, please replace "an application" in line 2 with --an application configured for execution on one or more processors included in the system--.

Please amend claim 51 to read:

A list generating engine that extends an application program interface (API), comprising:  
one or more processors configured to provide the list generating engine that includes:  
means for receiving properties of a user-selectable display list to be  
displayed in a graphical user interface from an application;  
means for attaching user-selectable display controls to the display list;  
means for accessing data elements from a data source, the data elements to  
be displayed in the display controls;  
means for establishing a display state of the display controls;

means for receiving a request to change data elements in the display controls;

means for managing the data elements in the display controls according to the display state; and

means for requesting an additional property of said data element from the data source beyond that which is currently displayed within the display list without listening to a display control corresponding to said data element.

#### **Examiner's Statement Of Reasons For Allowance**

The following is an examiner's statement of reasons for allowance: Applicant's arguments filed 27 March 2009 are persuasive as to overcome the rejection of record. Specifically, the examiner finds no sufficient teaching of a "unique identifier identifying an additional property of said data element from the data source without listening to a data item corresponding to said data element". The examiner agrees that the generic event handlers cited in Apte does indeed "listen" to events in a manner inconsistent with the limitations of claim 42. A further prior art search has failed to produce any relevant results.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL ROSWELL whose telephone number is (571)272-4055. The examiner can normally be reached on 9:30 - 6:00 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kieu Vu can be reached on (571) 272-4057. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>.
